PROBLEM 1

# 9 MONTHS

## FROM IDEA TO APPROVAL

**The time needed to write a project.**

Typically, a novice takes around 10 weeks to complete an initial project draft. Then, it takes another week to ger feedback from someone and to refine it. And then, you have to wait about six painful months after submission to get the evaluation results.

That's almost 9 months of your life. No wonder many people give up before starting, or you must sacrifice a big chunk of your life.

PROBLEM 2

# 76%

## REJECTION RATE

**76 projects out of 100 are NOT funded**

The average acceptance rate is about 24% of all proposals. In other words - 76 out of 100 ideas get rejected, and all those months of hard work were for nothing.
